Low Profile Constant Contact Side Bearing

Easy to Install

Our new 6343 Low Profile Constant Contact Side Bearing is making friends everywhere it goes. It's no wonder, with its no-hassle, drop-in design. It's making friends in the shop with car men who like it, because "it's easy to install". And, it's making friends with car owners who like it, because "its no-weld design takes less time to install". Now, with the SCT 6343, tank cars really can be retrofit on a rip track!

Robust Design

With its AAR Premium Side Bearing Rating, the SCT 6343 has the kind of robust design that stands up to the railroads' toughest challenges. That's why it's making friends with car maintenance managers, because "its user-friendly one-piece design" has no internally sliding parts to wear each other out. And, at replacement time they know they won't have any torch and grind removal to worry about.
