Shear Pads – 500K Miles – Coal Service

The shear pads on this S-2-E Barber Stabilized Truck have been in coal service for 500,000 miles.

And, they have protected the roller bearing adapters, side frame pedestals, and thrust lugs from wear.

They remain in top condition after delivering half a million miles of wheel, rail, and fuel saving service.

The S-2-E is also available for S-286 open top cars with the **Barber S2-86™** Radial Adapter! Contact your SCT Sales Manager today, and specify S-2-E with Barber S2-86 Adapters for your next car build.
